Engerix-B (Hep B)	Varivax
Bexsero (MenB)	

Special Order Vaccines

DT	Tenivac (TD)
IPOL (EIPV)	Pneumovax23 (PPV23)

Adult Supply

Pneumovax23 (PPV23)
Gardisal (HPV9)
MMR II (MMR)
Varivax
Pevnar 13 (PCV13)
Tenivac (Td)
Adacel (Tdap)
Menactra (MCV4)
Recombivax (Hep B)
Vaqta (Hep A)
Bexsero (MenB)

Special Order Vaccines

Twinrix (Hep AB)
Trumemba (MenB)

Vaccine Eligibility

Pediatric Supply

- Due to agreements with bordering states there are no restrictions for administering vaccines to children (<19)

Adult Supply

- ≥ 19 years of age
- RI resident or receives health benefits through a RI employer
- Insurance status:
 - Insured: Free vaccine, bill insurer for admin
 - Uninsured: Free vaccine, waive admin fees (optional)
- Use of SSV for non-eligible patients is prohibited

Adult Vaccine Eligibility

Medicare

- Due to current changes in the way RIDOH is to assess insurers, Medicare recipients will be allowed to receive State Supplied Vaccines for State Fiscal Year 2018 (July 1, 2017 – June 30, 2018)
- Part A / B plans covered through insurer assessments
 - those with an Advantage plan (a Medicare plan offered through an HMO or PPO)
- Fee-for-service (MFFS) included in this year's supply
- No need for reimbursement to RIDOH or order of private supply
 - This may not apply in future years.

Delivery Schedule Influenza Vaccine

Pediatric and Adult

- First orders
 - Dependent on manufacturer releases and inventory amounts received
- All Subsequent Orders
 - Orders will be based solely on the amount of vaccine that RIDOH has received
 - If RIDOH has received 35% of our total allocation for the season the provider may order up to 35% of their season's reserve
 - Once 75% of reserve has been received, providers will be allowed to order additional supply as long as 50% or more of supply has been reported as administered
 - Once 100% of reserve has been received, provider shall be able to order up to 20% additional supply, as long as 75% of shipped vaccine has been reported as administered

Manufacturer release schedule

- 50% by September 15, 2017
- 100% by November 1, 2017

RI Vaccine Online Ordering System

- Ocean State Management of State Supplied Immunizations System (OSMOSSIS)

Orders must be submitted on-line

- OSMOSSIS Monthly ordering section
- OSMOSSIS Flu ordering section

Ordering process

1. Submitted by Provider
2. Approved / Denied by RIDOH
 - Within 2 business days of submission
3. Processing (submitted to CDC)
 - Within 1 business day of approval
4. Shipped
 - Monthly orders may take up to 10-business days
 - Influenza orders may take up to 5-business days
5. Received
 - Product must be received into OSMOSSIS within 4-hours of delivery in order to be eligible for return should there be a problem with the order/shipment.

Weekly Ordering (Influenza)

Weekly Influenza Ordering Module

- Report doses administered
 - By Product and Age Group
 - 6-35 mos, 3-18 yrs, 19-64 yrs, 65+ yrs
 - Pregnant Women and Healthcare Workers
- Report inventory on-hand
- Request additional vaccine supply
 - Based on supply % available by RIDOH
 - 20% Over Reserve allowed if 75% of all vaccine shipped has been administered

Orders will be filled:

- Same week ordered if order is approved on a Monday or Tuesday
- The following week for orders approved Wednesday – Friday
- Based on available supply

Monthly Ordering

Orders must be submitted on-line:

- OSMOSSIS Monthly Order section
- Orders are available no more than once every 30 days

Orders will be filled:

- May take up to 10 business days after RIDOH approval

Reporting Requirements:

- Maintain 60-day supply
- Inventory on-hand is required with each monthly report
 - regardless of ordering additional doses

KRDA: (Pediatric Vaccines Only)

- KIDSNET Reported Doses Administered
- Tracked with each monthly order for comparison

Waste / Returns

Waste/Returns must be reported through OSMOSSIS

- Return is vaccine that is still in original condition and may be returned as such
- Waste is vaccine no longer in original condition and cannot be returned (pre-drawn, damaged, reconstituted, etc...)
- Returns are not allowed for viable vaccine unless:
 - Spoiled due to temperature breach
- Viable Flu vaccine cannot be returned unless:
 - RIDOH reports zero influenza activity or end of influenza season

HEALTH submits returns bi-weekly or monthly (as needed)

- Store returns in a plain box for courier pick-up.
- No cold chain required
- Print OSMOSSIS Packing Slip and Emailed Shipping Label
- UPS pick-up or drop-off

Transfers

OSMOSSIS will allow providers to transfer vaccines between participating SSV Practices

- Requires initiation from the practice releasing the vaccine
- Requires acceptance from the practice receiving the vaccine
- If a transfer is rejected by the receiving practice the initiating practice must Approve or Deny the rejection.
 - RIDOH will intervene if the rejection is denied
- Unavailable if a vaccine order is in “Submitted” status
- Unable to place additional orders while there is an active transfer
 - May need to remind receiving practice to accept the transfer

State of Rhode Island
Department of Health

Welcome to Immunize for Life

Welcome to the Immunize for Life, State-Supplied Vaccine (SSV) Program Enrollment. There are two ways to access the SSV Program for enrollment, updating Practice information, and Seasonal Influenza dose reporting/ordering:

1. **KIDSNET Login** (KIDSNET authorized users only)
 - Log in using individual KIDSNET user Id and password
 - Click on SSV Practice Menu in left hand menu
 - Click on the appropriate menu choice

If you are having difficulty logging into KIDSNET, please call the Help Desk 222-5960 or your KIDSNET Provider Relations Representative.

OR

2. **SSV Login**
 - Log in using SSV PIN number and lead physician/medical director's license number
 - Click on the appropriate menu choice

If your practice/facility has never been enrolled in any SSV program, it has been longer than one year since you last enrolled in any SSV program, or you are having a problem logging in, please call Deb at 222-7876.
